## New VC6 Pro

All-in-One Controller

**NOVA STAR**

# Introduction

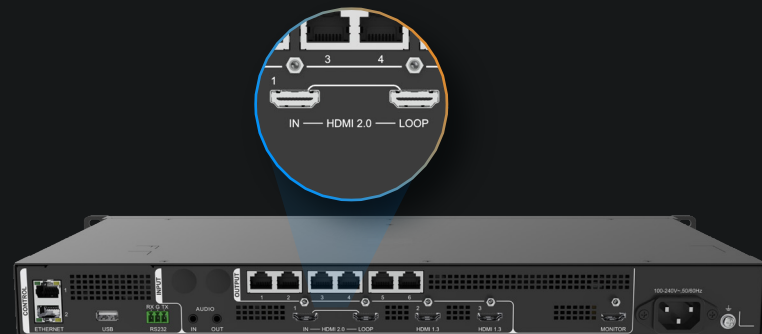

The VC6 Pro is an all-in-one controller featuring 6 Ethernet ports, combining video processing and LED controlling. A single device can support maximum loading capacity of 3.9 million pixels.

## Core Features

### Real 4K Inputs

- HDMI 2.0 interface for pixel-to-pixel clarity and superior image quality.

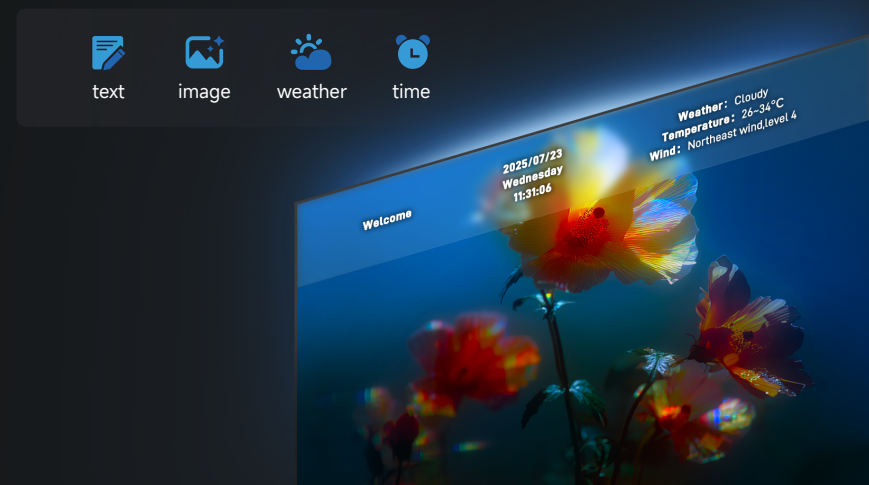

## Multiple Layers and Presets

- Up to 6 × 2K layers or 1 × 4K + 2 × 2K layers, all layers support roaming and scaling.
- Increased preset quantity up to 256.

## Upgraded OSD Features

- Now supports text, image, weather, time — with customizable settings to fit your needs.

## USB Playback

- Insert a USB drive for instant plug-and-play convenience and use a USB source as an input source, allowing for convenient testing and video playback.

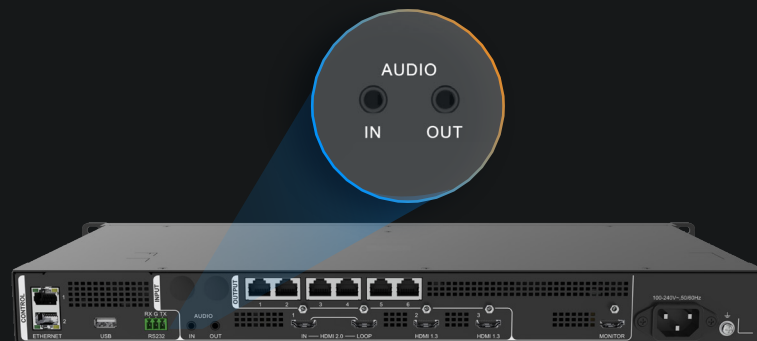

## Multiple Operation Methods

- Use VICP App, front panel and Unico Web to switch inputs and presets, adjust brightness and so on, easy, friendly and convenient.

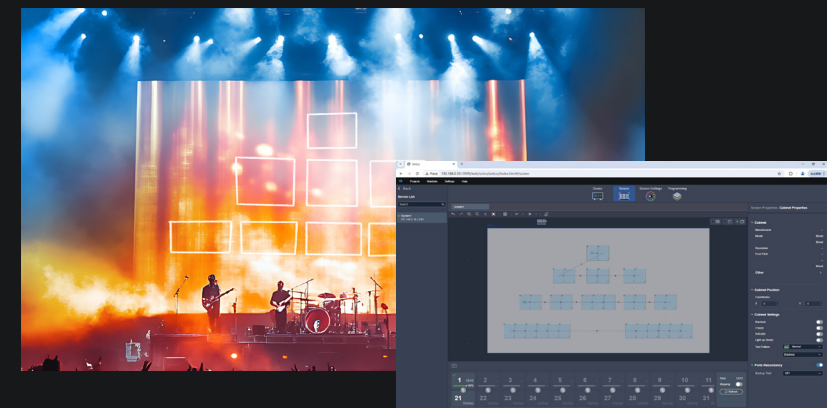

## Independent Audio Connector

- Supports switching between independent audio and accompanied audio, no requirement for additional audio device.

## Free Topology

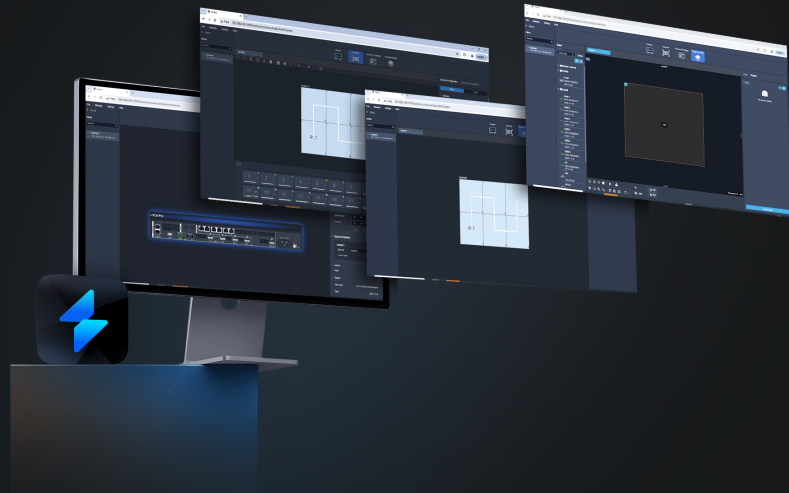

- Without rectangle restriction, loading capacity is calculated based on the physical cabinet, enhancing Ethernet port utilization and making configuration easier.

(\*Specific receiving cards are required.)

## Brand New Software, B/S Structure

- Compatible with macOS Windows and Web;
- One software controls all;
- Visualized control interfaces. User-friendly experience.

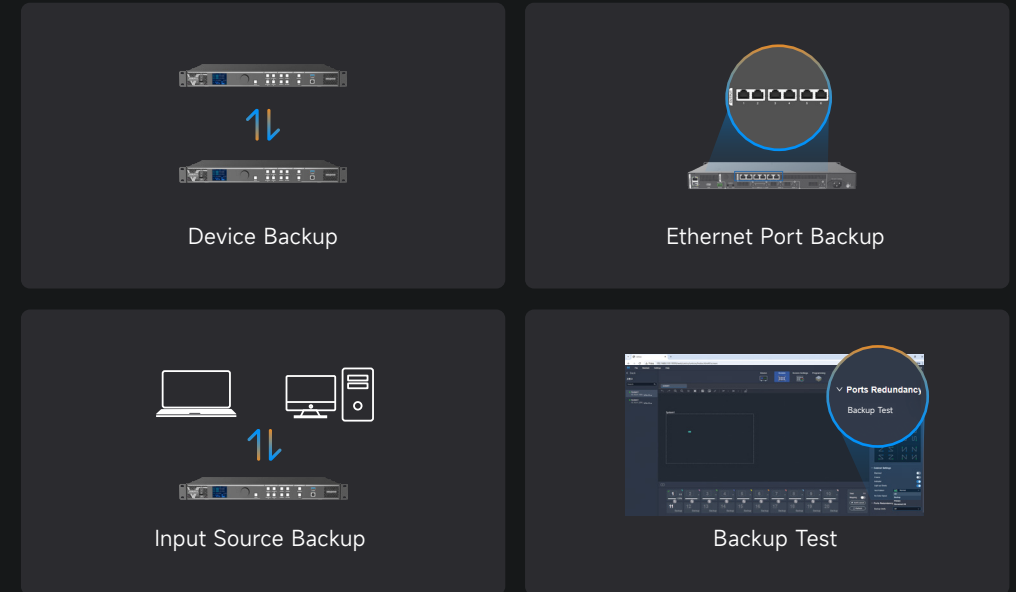

## Multi-language Menu Support

- Intuitive multi-language menu for users worldwide.

## End-to-End Backup

Complete full-link backup ensures stability on-site.
